

Last May we were in Chicago for the CMS Expo organized by the good people at Coffee Group, USA, who happens to also organize events for Joomla Chicago user group. At the event, a lot of knowledge was exchanged about Joomla in a highly interactive environment. Many went home, having lots of fun, their questions answered and knowledge gained! The event was highly successful, and due to more than encouraging response, the good guys at Coffee Group decided to hold another CMS Expo, this time, BIGGER with 17 presenters and 26 learning sessions in two days - more talks, more fun! Winter CMS Expo will be held in Denver, Colorado on December 4th and 5th. And we're going to be there! Azrul will be talking about Advanced Components and Blogging with Joomla. Be sure you'll be there and don't miss out on this great event. Check out the details of the Winter CMS Expo

The team at Azrul.com has released My Blog for over a year now. From it's inception, My Blog has grown into a more mature component from it's simple beginnings. Our strength with My Blog and all our components is the design. We intend it to be absolutely simple and intuitive, and also key is that My Blog is customizable from templating to features to integration with other components. Take a look at how My Blog is used at [Joomla Shack](#) and [Joomla Junkie](#). We also would like to thank Joe Scarry, a member of Joomla Chicago for using My Blog at their [official website](#)

:

And to quote his own words, "this My Blog extension is fabulous!" Thanks once again.
